Kolkata, West Bengal | +91 6289970438 | bardhansubhajit3@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Mobile Application Developer with a strong foundation in building advanced Android solutions and cross-platform mobile architectures. Experienced in Native Android (Java) and Flutter, with a proven track record of managing the full mobile development lifecycle—from conceptualization and UI design to continuously integrating RESTful APIs and deploying robust, high-performing applications to the Google Play Store. Adept at leveraging both mobile SDKs and scalable backend systems to deliver seamless user experiences.

TECHNICAL SKILLS

- **Mobile Development:** Android SDK, Native Android (Java), Flutter, React Native, Full Mobile Lifecycle
- **API & Data Integration:** RESTful APIs, JSON, Third-Party Library Integration (Retrofit, Volley, Glide), Remote Data Fetching
- **Backend & Frameworks:** Java, Spring Boot, Node.js (understanding of backend services to optimize mobile data consumption)
- **Databases & Local Storage:** SQLite, Room Database, PostgreSQL, MySQL
- **Tools & Architecture:** Android Studio, VS Code, Git, Postman, Docker, High-Volume/Low-Latency Design

PROFESSIONAL EXPERIENCE

Android Developer Intern

Jan 2025 - June 2025

Divergent Consultancy Services | Kolkata, WB

- Designed and built advanced applications for the Android platform utilizing the Android SDK and native Java, ensuring optimal performance and responsiveness.
- Managed the full mobile development lifecycle, successfully developing, testing, and deploying the **KF Retailer** application to the Google Play Store.
- Worked extensively with remote data via REST APIs and JSON payloads, integrating third-party libraries such as Retrofit and Volley to maximize mobile user engagement and data synchronization.
- Implemented custom UI components and optimized on-device local storage architectures to guarantee smooth, seamless user experiences across various Android device specifications.

Software Engineer

Sept 2025 - Present

Nevaeh Technology Private Limited | Kolkata, WB

- Architect and develop high-volume, low-latency enterprise backend systems using Java Spring Boot, designing robust RESTful APIs that serve as the backbone for frontend and mobile client communication.
- Design and integrate scalable API endpoints to facilitate seamless remote data transmission, directly improving client-side data consumption efficiency.
- Manage Relational Databases (PostgreSQL, MySQL) utilizing Hibernate for efficient ORM, ensuring robust data integrity for multi-platform applications.

KEY PROJECTS

Native Android Utility Application

Tech Stack: Java, Android SDK, REST, JSON, Third-party APIs

- Developed a performance-driven Android application featuring highly customized UI elements and seamless third-party API integrations for real-time data fetching.
- Structured robust local data management and handled complex remote data processing using optimized JSON payloads, resulting in a highly responsive mobile utility.

EDUCATION

B.Tech in Computer Science and Business Systems

CGPA: 7.95/10

Heritage Institute of Technology, Kolkata, WB

Diploma in Computer Science and Technology

CGPA: 8.5/10

The Calcutta Technical School, Kolkata, WB
