

SUBHAJIT BARDHAN

Kolkata, West Bengal | +91 6289970438 | bardhansubhajit3@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in building high-performing, scalable, enterprise-grade backend applications and advanced Android mobile solutions. Experienced in the Spring Framework, Relational Databases, and ORM technologies for mission-critical microservices, alongside extensive Android SDK expertise. Proven ability to manage the full development lifecycle, from architecting high-availability systems to continuously discovering and deploying robust mobile applications to the Google Play Store.

TECHNICAL SKILLS

- **Backend & Frameworks:** Java, Spring Boot, Java EE platforms, Node.js, Express.js
- **Mobile Development:** Android SDK, Native Android (Java), Flutter, React Native, Full Mobile Lifecycle
- **Databases & ORM:** PostgreSQL, MySQL, MongoDB, H2 Database, Hibernate, Advanced SQL
- **API & Data:** RESTful APIs, JSON, Remote Data Fetching, Third-Party Library Integration (Retrofit, Volley, Glide)
- **Tools & Architecture:** Docker, Git, Postman, Android Studio, VS Code, High-Volume/Low-Latency Design

PROFESSIONAL EXPERIENCE

Software Engineer | Nevaeh Technology Private Limited | Kolkata, WB | *Sept 2025 – Present*

- Architect and develop high-volume, low-latency applications for mission-critical systems using Java Spring Boot and Java EE principles, delivering high-availability and performance.
- Manage Relational Databases (PostgreSQL, MySQL) and utilize Hibernate for efficient object-relational mapping (ORM) to ensure robust data integrity.
- Design and integrate scalable RESTful APIs to facilitate seamless remote data communication between frontend clients and server architecture.
- Contribute to all phases of the backend development lifecycle, continuously investigating alternatives and presenting architectural improvements.

Android Developer Intern | Divergent Consultancy Services | Kolkata, WB | *Jan 2025 – June 2025*

- Designed and built advanced applications for the Android platform utilizing the Android SDK and native Java.
- Worked extensively with remote data via REST and JSON, integrating third-party libraries (such as Retrofit and Volley) to maximize mobile user engagement.
- Managed the full mobile development lifecycle, successfully developing and deploying the KF Retailer application to the Google Play Store.

- Implemented custom UI components and optimized on-device local storage to ensure smooth, responsive user experiences.

KEY PROJECTS

Tripura High Court DMS | Java, Spring Boot, PostgreSQL, Hibernate

- Engineered secure, enterprise-grade backend modules to facilitate the digital management, storage, and retrieval of highly sensitive court records.
- Developed scalable architecture utilizing SQL and ORM technologies to ensure rapid data retrieval and high system availability.

Chandigarh Land Record DMS | Java, Spring Boot, MySQL, REST APIs

- Designed optimized relational database architectures and APIs to digitize and manage municipal land ownership records.
- Built high-performing querying systems capable of handling large datasets with low latency.

Native Android Utility Application | Java, Android SDK, REST, JSON

- Developed a performance-driven Android app featuring custom UI elements and seamless third-party API integration.
- Structured local data management and handled remote data processing using JSON payloads.

EDUCATION

B.Tech in Computer Science and Business Systems

Heritage Institute of Technology, Kolkata, WB | CGPA: 7.95/10

Diploma in Computer Science and Technology

The Calcutta Technical School, Kolkata, WB | CGPA: 8.5/10
